Introducing Human Geographies

Second Edition

EDITORS: **Paul Cloke**, *Professor of Human Geography, University of Exeter, UK*

Philip Crang, *Professor of Cultural Geography, Royal Holloway, London University, UK*

Mark Goodwin, *Professor of Geography, University of Exeter UK*

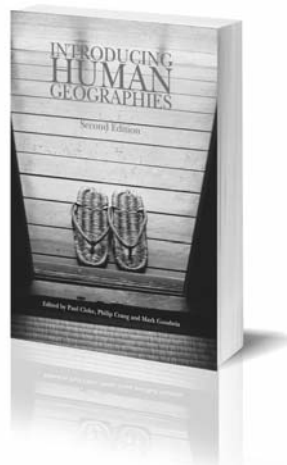

'Content, structure, presentation – all superbly tailored to a first year undergraduate audience. Discussion points are very useful. This is an excellent textbook, packed with useful ideas and references. Beautifully presented, written by top class geographers.'

Dr Kneafsey, Coventry University, UK

Introducing Human Geographies is a comprehensive, stimulating and innovative introduction to human geography. This second edition has been thoroughly revised and updated to build upon the success of the acclaimed first edition. Now in full colour and with sixteen new chapters, discussion points and glossary definitions in the margin, it is even more accessible.

Part one discusses the principal ideas through which human geographers understand and shape their subject. Part two examines each of the main sub-fields: Cultural geography; Political geography; Development geography; Rural geography; Economic geography; Social geography; Environment geography; Urban geography; Historical geography. Part three demonstrates how different thematic interests are combined in cutting-edge human geographical debates.

CONTENTS: Introduction / Part 1 Foundations / Culture-Nature / Society-Space / Local-Global / Control-Freedom / Self-Other / Image-Reality / Masculinity-Femininity / Science-Art / Relevant-Esoteric / Part 2 Themes / Section 1 Cultural Geographies / Imaginative Geographies / Landscape / The Geographies of Material Cultures / Section 2 Development Geographies / Theories of Development / Rethinking Development / Survival and Resistance / Section 3 Economic Geographies / Production / Money and Finance / Consumption Geographies / Section 4 Environmental Geographies / Global and Local Environmental Problems / Sustainability / Environmental Knowledges and Environmentalism Section 5 Historical Introduction / Memory and Heritage / Colonialism and Postcolonialism / Modernity and Modernisation / Section 6 Political Introduction / Geopolitics / Citizenship and Governance / Nationalism / Section 7 Social Introduction / Identity / Identity and Difference: Age, Disability and Sexuality / Exclusion / Section 8 Urban and Rural Geographies / Urban Forms / Sensing the City: Urban Experiences / The Country / Part 3 Issues / Emotional Geographies / Place / Diasporas / Migration and Refugees / Travel and Tourism / Commodities / The Media / War / Peace / Globalization and Protest / Who Cares? / Postscript: Your Human Geographies

The Geography of the World Economy

Fifth Edition

Paul Knox, *Professor and Dean of the College of Architecture and Urban Studies, Virginia Polytechnic Institute and State University, USA*

John Agnew, *Professor of Geography, UCLA, USA*

Linda McCarthy, *Associate Professor of Geography, University of Wisconsin-Milwaukee, USA*

'There is much to admire in this book, not least the clear erudition and breadth of reading displayed by the authors and the fact that it is consistently well written. This is a truly comprehensive book.'

Transactions of the IBG (about the Fourth Edition)

The Geography of the World Economy provides the basis for understanding the internal and external economic interactions of both industrialised and developing countries. Multifaceted in approach, it discusses local, regional, national, as well as global economic development over the course of history, and, as such, gives readers a thorough overview on many different levels. Illustrated in colour throughout, this new edition takes into account recent changes in the world economy. It is ideal for upper level university graduates and university postgraduates at all levels in geography; political sciences; economics; international relations; international business studies; global studies.

Providing students with information on the latest issues, this book includes:

- New sections reflecting the rapidly changing nature of the globalisation of the world economy
- In depth sections on the rise of Brazil, Russia, India and China
- New material on the ever-changing and complex area of international terrorism
- Downloadable maps and diagrams available free at www.hodderplus.com/geography

CONTENTS: Economic Patterns and the Search for Explanation / Rise of the Core Economies / Spatial Transformation of Core and Periphery / Adjusting to a New Global Economy / Key Sources and Suggested Reading / Glossary

Geography and Geographers

Seventh Edition

Ron Johnston, *University of Bristol, UK*

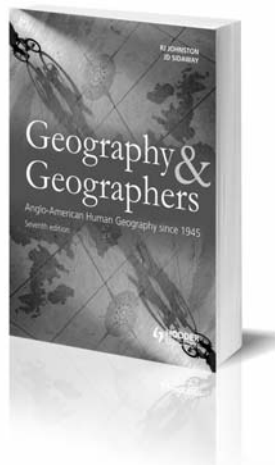

James Sidaway, *University of Amsterdam, The Netherlands*

Geography and Geographers continues to be the most comprehensive and up-to-date overview of the field of human geography available. It is essential reading for all students of geography.

It provides a survey of the major debates, key thinkers and schools of thought in human geography in the English-speaking world, setting them within the context of economic, social, cultural and political, as well as intellectual, changes.

This seventh edition has been extensively revised and updated to reflect developments in the field and the ways that geography and its history is understood and taught. But, above all, the book retains its key strength of offering a thoroughly contemporary perspective on human geography ideal for new and more experienced students alike.

NEW
edition

Features

- Explores the relationship between human and physical geography
- All chapters have been updated to reflect new literature and changes in the discipline
- Chapter one systematically considers representations of geographical thought
- The closing chapter develops an explicit argument about what has made human geography distinctive

CONTENTS: (Sixth Edition) 1. The nature of an academic discipline / 2. Foundations / 3. Growth of systematic studies and the adoption of 'scientific method' / 4. Human geography as spatial science / 5. Humanistic geography / 6. 'Radical' geographies / 7. Postmodern geographies / 8. Feminist geographies / 9. Applied geography and the relevance debate / 10. A changing discipline? / Bibliography / General Index / Author Index

The Companion to Development Studies

Second Edition

Vandana Desai, *Senior Lecturer in Development Geography, Royal Holloway, University of London, UK*

Robert Potter, *Professor of Human Geography, University of Reading, UK*

The new edition of this one-stop reference title presents an even more comprehensive overview of the key theoretical and practical issues dominating contemporary development studies. This title has mass appeal to students of development studies at all levels, from undergraduate to postgraduate and beyond, as well as in departments of geography, politics, international relations, sociology, social anthropology and economics, thanks to its wide-ranging material and multi-disciplinary approach.

Up-to-date and comprehensive this book provides:

- Input from over 100 international experts
- New chapters on a range of cutting-edge topics, including ageing, culture and development, corruption and development and global terrorism

Encourages further study and discussion with:

- Each chapter summarising current debate
- End of chapter guidance on further reading and research

CONTENTS: The Nature of Development and of Development Studies / Theories and Strategies of Development / Rural Development / Globalisation, Employment and Development / Urbanization / Environment and Development / Gender, Population and Development / Health and Education / Political Economy of Violence and Insecurity / Governance and Development

An Introduction to Geological Structures and Maps

NEW
edition

Eighth Edition

Dr George M. Bennison, formerly of University of Birmingham, UK

Dr Paul A. Oliver, Herefordshire Council, UK

Keith A. Moseley, Monmouth School, UK

An Introduction to Geological Structures and Maps is a concise and accessible textbook providing simple structural terminology and map problems which introduce geological structures. It is a perfect introduction to mapping for students of geology, engineering geology and civil engineering.

This new, eighth edition contains simplified introductory matter to make the subject as easy to grasp as possible. Colour photographs illustrating geological structures bring the subject to life and a new map from the British Geological Survey illustrates a real area. There is more coverage of outcrop patterns, and of structures and the relationship of topography to geological structure.

Features

- Colour photographs bring geological structures to life
- Introductory matter is expanded and explained in more detail making the subject more accessible
- A British Geological Survey map is included, illustrating a real area
- A new economic map problem appeals to engineering students
- A new colour design gives the book more visual appeal
- A new geological glossary helps students understand key terms

CONTENTS: List of Plates / Preface to the current edition / Preface to the previous edition / Key to maps / 1. Strata – the ground rules / 2. Horizontal strata / 3. Dipping strata / 4. Three-point problems / 5. Unconformities / 6. Folding / 7. Map solution without structure contours 1 / 8. Faults / 9. Map solution without structure contours 2 / 10. More folds and faulted folds / 11. Igneous and impact features / 12. Economic problems / 13. Complex structures / Appendix / Glossary / Index

Water Sustainability

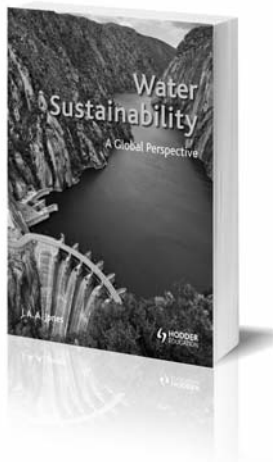

A Global Perspective

NEW

J.A.A. Jones, Chair of the International Geographical Union's Commission for Water Sustainability, working with both the UN and NATO on issues relating to global water supplies. Also previous editor for *GeoJournal*, *Physical Geography and Area*

This work provides students of international relations, geography or environmental management with a comprehensive and up-to-date global view of water sustainability.

Using the latest mapping techniques, Professor Jones examines water availability, the impact of climate change and the problems created for water management worldwide as well as possible solutions. *Water Sustainability: A Global Perspective* is the first textbook to meld the physical and human aspects affecting the world's water resources.

- **Authoritative** – written by J.A.A. Jones, one of the world's foremost experts on water sustainability
- **Up-to-date** – includes 80 original, colour maps illustrating current water resources as well as future predictions
- **Unique** – the first text to cover issues of poverty, disease, debt, trade, food supply and terrorism in the context of water resources
- **Forward thinking** – focuses on solutions for the future
- **Accompanying website** – Maps and figures available for free download at www.hodderplus.com/geography

CONTENTS: Introduction: A Looming Crisis / Part I Problems / Rising Demand and Changing Resources / Feeding the World / The Threat of Global Warming / The Changing Geography of Wealth and Influence / Water, Pollution and Disease / Dams and Diversions / Water for Nature / Water, War and Terrorism / Trading Water / Private Profit or Public Good? / Part II Resources / The Restless Water Cycle / Shrinking Freshwater Stores / Part III Solutions / Controlling Demand / Soft Pathways / Technical Solutions / Advances in Water Science / Low Tech and Human Scale / High Tech and Novel Solutions / Conclusions

Introduction to Coastal Processes and Geomorphology

NEW
edition

Second Edition

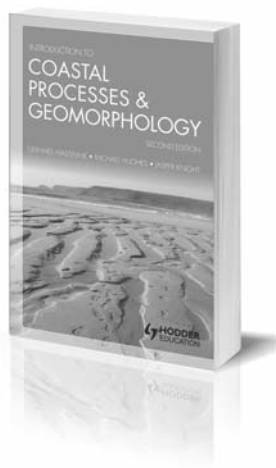

Gerd Masselink, *University of Plymouth, UK*

Michael Hughes, *University of Sydney, Australia*

Jasper Knight, *formerly of University of Exeter, UK*

Introduction to Coastal Processes and Geomorphology begins by discussing coastal systems and shows how these systems link to the processes examined in detail throughout the book.

A new chapter addresses the forward-facing aspect of coastal morphodynamics, including the ways in which coasts respond to rapid climate changes such as present day global warming. Also new to this second edition is a chapter on future coasts which considers the wider effects of coastal change on other important aspects of coastal systems, including ecology, management, socio-cultural activities, built and natural heritage, and archaeology. Case studies using examples from around the world illustrate theory in practice and help bring the subject to life.

Features

- Case studies help to put theory into practice
- A new chapter on the future of coastal morphodynamics explores the impact of climate change on coasts
- A new chapter on 'Future Coasts' uniquely considers the wider effects of coastal change on other important aspects of coastal systems
- More pedagogy includes 'aims' at the start of the chapters and 'questions' at the end of chapters to focus student learning
- Online materials for students include the answers to the new questions available to download as MP3 files as well as interactive MCQs and worked examples – www.hodderplus.com/geography
- Online materials for lecturers include figures and photos available for free download and use in PowerPoint presentations – www.hodderplus.com/geography

CONTENTS: Preface / Symbols / 1. Coastal systems / 2. Sea level / 3. Tides / 4. Waves / 5. Sediments, boundary layers and transport / 6. Fluvial-dominated coastal environments / 7. Tide-dominated coastal environments – E / 8. Wave-dominated coastal environments – B / 9. Coastal sand dunes / 10. Geologically-controlled coastal environments / 11. Coasts and Climate Change / 12. Future Coasts / References / Index

Glaciers and Glaciation

Second Edition

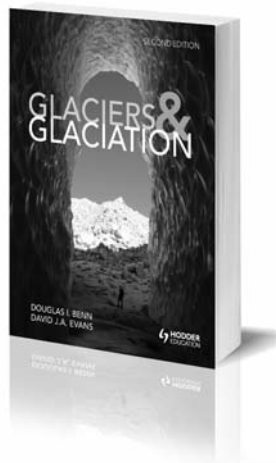

Douglas I. Benn, Reader in Geography & Geosciences, University in Svalbard, Norway

David J.A. Evans, Reader in Geography, Durham University, UK

“This book is the best of its kind, an impressive contribution to science and to education.”

Professor G.K.C. Clarke for the American Geophysical Union – about the first edition

Aimed at undergraduate students of geography, geology and environmental science, the new edition of this bestselling classic will provide an up-to-the-minute overview of the nature, origin and behaviour of glaciers and the geological and geomorphological evidence for their past history on earth.

All students of glaciation will find this a stimulating, accessible and comprehensive resource:

- **Easy to understand** – Looks at key contemporary issues in a straight forward manner
- **Easy to follow** – All chapters have been summarised for quick reference
- **Easy to visualise** – Over 1,200 illustrations including more than 300 colour photographs illustrate all glacial features

CONTENTS: Part I Glaciers / Introduction / Snow, Ice and Climate / Glacier Hydrology / Processes of Glacier Motion / Glacier Dynamics / The Greenland and Antarctic Ice Sheets / Glaciers and Sea-level Change / Part II Glaciation / Erosional Processes, Forms and Landscapes / Debris Entrainment and Transport / Glacigenic Sediments and Depositional Processes / Sediment–Landform Associations / Landsystems and Palaeoglaciology

ENVIRONMENTAL ISSUES

The Global CasinoAn Introduction to Environmental Issues
Fourth Edition**Nick Middleton**, *Fellow and Lecturer in Physical Geography, St Anne's College, University of Oxford, UK*

The Global Casino is a compelling introduction to environmental issues that links the physical environment to its political, socio-economic contexts. This book is particularly useful for first and second year undergraduates studying Geography, Environmental Science and Development Studies.

**Updates students on ongoing global issues:**

- In line with contemporary international trends, the emphasis is placed on the critical concept of sustainable development.
- New case studies from around the world are used to illustrate key environmental issues, from global warming and deforestation to natural hazards and soil erosion.
- Covers recent topics, including the Indian Ocean tsunami of 2004, climatic change and the Intergovernmental Panel on Climate Change's (IPCC) 4th report

Encourages students to learn autonomously and effectively:

- Extra reading links and suggestions, and a comprehensive glossary
- Discussion topics at the end of each chapter
- Free downloadable diagrams available at www.hodderplus.com/geography

CONTENTS: The Physical Environment / The Human Environment / Sustainable Development / Tropical Deforestation / Desertification / Oceans / Coastal Problems / Rivers, Lakes & Wetlands / Big Dams / Urban Environments / Climatic Change / Acid Rain / Food Production / Soil Erosion / Biodiversity Loss / Transport / Waste Management / Energy Production / Mining / War / Natural Hazards / Conclusions

The Key Issues in Environmental Change

SERIES EDITORS: **John A. Matthews, Ray S. Bradley, Neil Roberts and Martin A. J. Williams**

The Key Issues in Environmental Change series presents clear and up-to-date accounts of major issues of environmental concern.

Each book:

- Offers concise, yet authoritative and comprehensive coverage of a topic
- Draws on a wide range of technical sources
- Presents a range of international examples and case studies
- Introduces the reader to the latest theoretical and practical approaches
- Focuses on environmental issues from a temporal perspective, learning from the past with the aim of understanding and solving current and future problems of environmental change.

Study Skills for Geography, Earth and Environmental Science Students

NEW
edition

Third Edition

Pauline Kneale, *University of Plymouth*

There are moments in every student's degree when they are expected to do something unfamiliar and daunting - present a seminar, go on a fieldtrip, create a wiki page, lead a lab team - and how to do it or what to expect is unclear. Studying at university requires a different approach from studying at school and this book explains this transition. Packed with practical hints, study tips, short cuts, real-life examples and careers advice, this book will prove invaluable throughout a geography, earth science or environmental science degree.

Provides guidance on:

- Time management and effective research
- Constructing essays and creating arguments
- Giving presentations confidently
- Undertaking fieldwork and laboratory work
- Avoiding plagiarism and citing references correctly
- Using e-technologies such as blogs and your university's VLE
- Online assessment and peer feedback.

This guide also explains the role of the academic and how it differs from that of a school teacher, and prepares students for the world of work by showing how the skills learnt at university today can be used in a career choice of tomorrow.

CONTENTS: Preface / Acknowledgements / 1. Study skills - why bother? / 2. Reflection skills, reviewing and evaluating, adding value to your degree / 3. Threshold concepts – difficult things / 4. Maximizing free time / 5. Researching in libraries and online / 6. Effective reading / 7. Making effective notes / 8. Plagiarism and ethical behaviour / 9. Creativity - Innovation / 10. Thinking / 11. Constructing an argument / 12. Listening / 13. Oral presentations / 14. Discussion / 15. Researching and writing in teams: it's fun and efficient / 16. Acknowledging references and other sources / 17. Effective essay skills / 18. Writing practical reports / 19. Reviewing a book / 20. Abstracts and executive summaries / 21. Dissertations / 22. Revision skills / 23. Examinations / 24. Field-classes and fieldwork / 25. Presenting field sketches, sketch maps and data / 26. Posters and stands / 27. Careers for geographers / 28. 'Of shoes, and ships, and sealing wax ...' GEES Essentials / 29. Try This, crossword and quiz answers / Index

Access to Geography

SERIES EDITOR: **Michael Hill**

SERIES CONSULTANT: **Malcolm Skinner**

The Access to Geography Series follows the highly successful Access to... format, providing invaluable detail on subjects that are regular features on exam papers yet are merely touched on in core textbooks. Bought as a set or individually, these books offer fantastic value, providing students with the opportunity to look at important geographical issues beyond the restraints of a core book.

- Easy to navigate and compact – ideal for quick reference
- Packed with case studies, exam guidance and Key Skills practice for various topics these titles are useful teaching resources

Arid and Semi-Arid Environments

Michael Hill

978 0 340 80032 4 • 2002 • £11.99

Coasts and Coastal Management

Michael Hill

978 0 340 84638 4 • 2004 • £11.99

Development

Garrett Nagle

978 0 340 88487 4 • 2005 • £11.99

Economic Activity and Change

Paul Sheppard

978 0 340 81500 7 • 2004 • £11.99

Ecosystems

Meg Gillett

978 0 340 88920 6 • 2005 • £11.99

Glacial and Periglacial Environments

David Anderson

978 0 340 81247 1 • 2004 • £11.99

Globalisation

Paul Guinness

978 0 340 84637 7 • 2003 • £11.99

Hazards

Malcolm Skinner

978 0 340 84636 0 • 2003 • £11.99

Migration

Paul Guinness

978 0 340 80031 7 • 2002 • £11.99

Population

Jack Gillett

978 0 340 88673 1 • 2005 • £11.99

Rivers and Water Management

Garrett Nagle
