

## Macintosh Installation Instructions

On the disc you will find a folder called **Dynamic Learning (Student Edition)**, the Licence Agreement, and these instructions.

Please read the Licence Agreement, as by using the software you agree to be bound by its terms.

**You are licensed to use Dynamic Learning (Student Edition) only at home. It is not to be installed in your school or educational establishment.**

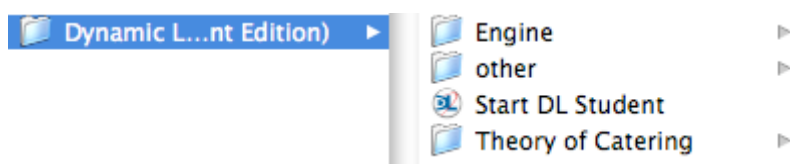

**A Network Edition of most titles will be available for use within your school. Please check our website, [www.dynamic-learning.co.uk](http://www.dynamic-learning.co.uk), for details.**

**Dynamic Learning requires OS X and a broadband Internet connection in order to function. Please also make sure that any security software on your Mac allows the program to access the Internet. See below for further details, or check [www.dynamic-learning.co.uk/faq](http://www.dynamic-learning.co.uk/faq) for frequently-asked questions.**

If this is your first Dynamic Learning title, simply drag the whole **Dynamic Learning (Student Edition)** folder to your Mac's hard disc. **It will not run from the CD/DVD-ROM.**

If you already have other Dynamic Learning titles installed, drag the **title** (e.g. "Theory of Catering") folder, which is within the **Dynamic Learning (Student Edition)** folder, to the **Dynamic Learning (Student Edition)** folder on your hard disc.

For "Theory of Catering" the folders should look like this. Other titles will have folders named accordingly:

### Initial launch of the program

To launch Dynamic Learning, double-click **Start DL Student**.

- You may be told that an update to the program is available and is being downloaded. The update will automatically download and install and the Dynamic Learning Engine will then launch.
- The first time you run this Dynamic Learning title, basic data about the title must be downloaded. This may take a few minutes, but only needs to be done once.
- News updates about this or related titles may be provided when you run the program. These are designed to keep you up-to-date with related resources that are available to help you with your studies.
- On-line tutorials are available to help you get the most from Dynamic Learning. To access the tutorials, click the **DL Tutorials** button at the top of the main Dynamic Learning window.

### Uninstallation

To uninstall Dynamic Learning from your computer, just move the whole **Dynamic Learning (Student Edition)** to the Trash and delete any aliases you may have created. The program creates a folder called **Dynamic Learning DO NOT EDIT** in your Documents folder; this too can be deleted.

### Technical hints

If Dynamic Learning cannot connect to the Internet, extra configuration of your security software may be required. Dynamic Learning requires access to the following domains. They are not all websites so a "page not found" error is not relevant:

<http://dynamiclearning.mmtdigital.co.uk>

<http://www.dynamic-learning.co.uk>

<http://edgecastcdn.net>

All connections are via HTTP Port 80. It is not possible to configure Dynamic Learning to use a proxy server or a different port. It is unlikely that you will be able to use the Student Edition in your school; nor are you licensed to do so.

**Unfortunately this version of Dynamic Learning is not compatible with OS 10.5 (Leopard).**

We are investigating the problem and hope to be able to provide a fix; please check

<http://www.dynamic-learning.co.uk/mac-help> for the latest news.
