

Contents

<i>Getting the most from this book</i>	v	5 Polar coordinates	102
<i>Prior knowledge</i>	vii	5.1 Polar coordinates	102
<i>Acknowledgements</i>	ix	5.2 Sketching curves with polar equations	108
1 Vectors 1	1	5.3 Finding the area enclosed by a polar curve	112
1.1 Review: Working with vectors	1	6 Maclaurin series	116
1.2 The vector equation of a line	10	6.1 Polynomial approximations and Maclaurin series	117
1.3 Lines and planes	23	6.2 Using Maclaurin series for standard functions	125
Review: Matrices and transformations	28	Review: Complex numbers	130
R.1 Matrices	28	R.1 Working with complex numbers	130
R.2 Using matrices to represent transformations	32	R.2 Representing complex numbers geometrically	132
R.3 Invariance	41	7 Hyperbolic functions	136
2 Matrices	47	7.1 Hyperbolic functions	136
2.1 Using matrices to solve simultaneous equations	50	7.2 Inverse hyperbolic functions	143
2.2 Finding the inverse of a 3×3 matrix	55	7.3 Integration using inverse hyperbolic functions	148
2.3 Intersection of three planes	60	8 Applications of integration	152
3 Series and induction	68	8.1 Volumes of revolution	152
3.1 Summing series	69	8.2 The mean value of a function	160
3.2 Proof by induction	74	8.3 General integration	162
4 Further calculus	80	Practice questions 2	168
4.1 Improper integrals	80	Review: Roots of polynomials	171
4.2 Calculus with inverse trigonometric functions	86	R.1 Roots and coefficients	171
4.3 Partial fractions	90	R.2 Complex roots of polynomial equations	174
4.4 Further integration	94		
Practice questions 1	100		

9	First order differential equations	178	12	Second order differential equations	255
9.1	Modelling rates of change	179	12.1	Higher order differential equations	255
9.2	Separation of variables	187	12.2	Auxiliary equations with complex roots	268
9.3	Integrating factors	195	12.3	Non-homogeneous differential equations	277
10	Complex numbers	204	12.4	Systems of differential equations	285
10.1	Loci in the Argand diagram	209	Practice questions 3		294
10.2	The n^{th} roots of a complex number	218	<i>Answers</i>		<i>296</i>
10.3	The form $z = re^{i\theta}$	228	<i>Index</i>		<i>000</i>
11	Vectors 2	236			
11.1	The vector product	236			
11.2	Finding distances	242
