

TOK bingo

Find examples in your classes and add them to the chart. You must be willing to explain why for it to count

IBReviewExtras

Download this activity as a PDF from www.hoddereducation.co.uk/ibreviewextras and get teaching notes that explain how to use it.

<p>Two roads diverged Conflicting hypotheses in a discipline</p>	<p>In black and white The textbook is wrong</p>	<p>What makes you think that? Getting your teacher to discuss why they think they know something</p>	<p>'We are the dreamers of dreams' An example of knowledge relying on imagination</p>	<p>The truth is out there 'Pseudo' science being offered as 'real' science</p>	<p>Known unknowns Unanswered questions driving a discipline</p>
<p>The stories we could tell A paradigm shift</p>	<p>Word play 'It depends on the definition of... ' or 'it depends on what you mean by...'</p>	<p>Big Brother next door A current and local example of propaganda</p>	<p>'He who mistrusts most should be trusted least' An example of knowledge relying on faith</p>	<p>'Hey ref — what game you watching?' Different interpretations leading to different theories</p>	<p>Twisted tongues Language was used to twist an argument</p>
<p>A thousand words Graphs that colour knowledge rather than illustrate it</p>	<p>Nice try An example of accepted knowledge changing over time</p>	<p>'Never doubt what nobody is sure about' An example of doubt driving research or knowledge</p>	<p>Is it art? An example of art in a 'non-artistic' discipline</p>	<p>Yea, right A poorly justified interpretation</p>	<p>Sheeple People think something is true because it's 'common', accepted, part of the status quo</p>
<p>Unknown unknowns A teacher suggesting that some 'fact' is not definitive</p>	<p>'There is no spoon...' An example of the senses leading us away from knowledge</p>	<p>Freedom fighters or terrorists? An example of language affecting how we know things</p>	<p>Blinded with science An example of science being biased</p>	<p>Wait...what? An example of a logical fallacy</p>	<p>Clever counting Statistics are manipulated in favour of a particular conclusion</p>
<p>Trust me, I'm a scientist Simply suggesting that 'science' has justified some fact</p>	<p>Intruder alert An example of one subject/discipline using knowledge from another subject/discipline</p>	<p>Back in my day... An example of knowledge relying on memory</p>	<p>To the victors An example of history being biased</p>	<p>A cute angle An example of beauty in mathematics</p>	<p>And...? Something that is true but has little relation to reality</p>
<p>Overcome by emotion Someone suggesting that emotion is not a good source of knowledge</p>	<p>Now that you mention it... A claim that you thought was certain turns out not to be</p>	<p>Because I said so... An example of knowledge based on authority</p>	<p>Wait a minute... Facts being presented — but 'there's more to the story'</p>	<p>How did we get here? Reason leading us astray</p>	<p>'Computer says no' Facts unavailable except through technology</p>
