Activity

A cleaner London

Michelle Minton

Complete the mind map on the following page to summarise the key information from the 'Cleaner London' article in WIDELWORLD Vol. 32, No. 4, using the success criteria below.

Success criteria

- Record key facts
- Use a ruler to draw all lines/arrows
- Keep in the same format
- Categorise information
- Only select key information
- Only record one or two words at a time

Mind map

Teacher notes

This mind-mapping activity encourages students to select key information and sort it into a mind map to support memory retention. Photocopy the mind map into an A3 sheet of paper for students to complete. You may need to model how you would like students to present their work. Once completed students can use this for self-quizzing — students write five questions based on this information for a partner/themselves to answer. They answer the questions without the mind map and then use the mind map to check their answers at the end. If they did not get at least four out of five correct, they should revise the mind map and complete the questions again.
